Plot No. 43A, SDF-3rd Floor
CSEZ, Kakkanad, Cochin
Kerala 682037
CIN U73200KL2009PTC039290

Note for High School Counsellor at the American School of Bombay

Our firm, SciGenom, specializes in providing genomic sequencing and bioinformatics services to healthcare businesses globally (a more detailed description is as provided below).

Kunaal Bhargava interned at our location in Cochin, India, in January 2016. During his time at SciGenom, Kunaal had the opportunity to learn about next generation gene sequencing processes and gene modification techniques using Crispr CAS 9 techniques. He shadowed some of our scientists and got the opportunity to ask them questions and learn about the work objectives and content. In addition, he also spent time with our bioinformatics team and learnt about the statistical programs they used to analyze the data. Our teams found Kunaal knowledgeable, well-informed and a quick learner. While it was not feasible for us to engage him in a live project, our team felt that he had the aptitude to take up further studies in this field and become a successful genomics or bioinformatics professional.

After his stint with us, he later followed up with me and my colleagues about the research he was taking up for his IB essay. My colleague, Dr.Karthik Kumaramangalam, advised him on the topic and based on the topic description that Kunaal provided us, we are quite impressed that he is taking up the serious issue of human longevity and its economic implications as his focus.

Kunaal is bright and motivated. We hope that he stays in touch with us and wish him all the best.

For` SciGenom Labs Pvt. Ltd.

Sam Santhosh
Managing Director

About SciGenom

SciGenom Labs is a Genomics R & D Services company, that provides genomic sequencing and bioinformatics services to lifescience and healthcare businesses globally as well as academic and government institutions in India. SciGenom started operations in Jan 2010. It is headquartered in Cochin, India with offices in Chennai & Hyderabad in India and San Francisco in the U.S. SciGenom is an NABL and ISO certified company, with a fully functional state-of-the-art molecular biology laboratory in Cochin and over 100 employees. It also has an R& D lab that is recognized by Department of Scientific & Industrial Research (DSIR), Ministry of Science & Technology and Government of India.
